

Bobcat Radiator & Mounting Bracket Revision

Due to high failure rate on radiators in some Bobcat skidsteer models, Bobcat has made the following changes and are retro fitting a new version radiator and bracket. Northern's replacement radiator is built to meet the new revision and accept the new mounting bracket. Please refer to the pictures below to determine if your application was built with the old or new style radiator and bracket.

For Bobcat skid steers with the new style radiator and bracket, Northern's replacement radiator will bolt right in.

For Bobcat skid steers with the old style radiator and bracket, the customer will have to purchase a from Bobcat to mount Northern's New style radiator.
